Instruction below for Mazda 2, Mazda CX-3, Mazda CX-5, Mazda CX-9

Tools Required; Tape measure, Marking pen, Drill, Ø11mm Drill bit.

1 Move to the rear of the vehicle and locate the end of the roof ditch mould. Carefully lift & unclip the roof ditch mould from the rear then move towards the front unclipping along the way.

3 With the roof ditch mould now marked, use an 11mm drill bit and carefully drill two holes in each roof ditch mould.

Use a deburring tool to tidy edges

2 Lay the roof ditch mould on the roof adjacent with the roof ditch itself as shown in Figure 1. Mark the centre of the roof ditch mould in line with the threaded mounting points found in the roof ditch. Use the measurements in Figure 2 as a guide. Always physically check against the vehicle.

Figure 1.

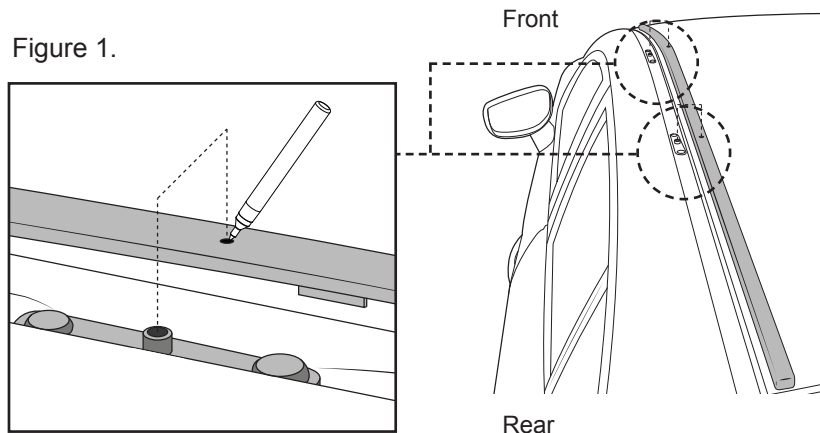

Figure 2.

MAZDA CX-9

From the front of the vehicle, use factory mounts 1 and 4.

- 4** Clip the roof ditch mould back into the roof.
Repeat previous steps for opposite side of the vehicle.

- 5** Insert the M6 threaded studs through the holes then fasten to the vehicles mounting points, finger tighten.
